      <h2>The Future of Web Development in 2026</h2>
      <p><strong>Published on:</strong> June 9, 2026 |
<strong>Author:</strong> Jane Doe</p>
```

<p>As we head into 2026, the landscape of web development is changing rapidly. Web applications are becoming more performant, and browser technologies are implementing features that previously required large libraries.</p>

<p>From native web components to improved CSS APIs, developers have more control over the user experience than ever before. In this article, we explore how modern APIs are replacing third-party dependencies.</p>

<h3>Key Takeaways:</h3>

- Performance remains a critical factor for SEO.
- Native tools are faster and easier to maintain.
- Semantic HTML improves accessibility automatically.

</article>

<hr>

<article>
<h2>Getting Started with HTML5 Semantic Elements</h2>
<p>Published on: June 8, 2026 |
Author: John Smith</p>
<p>Semantic HTML elements clearly describe their meaning to both the browser and the developer. Elements like <code><header></code>, <code><nav></code>, <code><main></code>, <code><article></code>, <code><section></code>, and <code><footer></code> organize your document outline.</p>

<p>Using these tags correctly ensures search engine web crawlers and screen readers for visually impaired users can traverse your content efficiently.</p>

<article>
<h2>Why Vanilla Web Tech is Making a Comeback</h2>
<p>Published on: June 7, 2026 |
Author: Alice Lee</p>
<p>Over the last decade, JavaScript frameworks dominated web engineering. Today, developers are realizing that vanilla HTML, CSS, and JS are mature enough to build feature-rich web products without the compilation overhead.</p>

Webpage-5:

The screenshot shows a web browser window with multiple tabs. The active tab is titled "Online Re..." and the address bar shows the file path "D:/MERN-TRAINING/Day-1/Exercise/ex4_registration.html". The webpage has a dark theme and is titled "Online Registration Form". Below the title, there is a message: "Please fill out this form to register for the upcoming class." The form contains several input fields: "First Name:" with a placeholder "Enter first name", "Last Name:" with a placeholder "Enter last name", "Email Address:" with a placeholder "name@example.com", "Password:" with a placeholder "Create a password", and "Date of Birth:" with a placeholder "dd-mm-yyyy" and a calendar icon. There are also radio buttons for "Gender:" (Male, Female, Other) and a dropdown menu for "Select Course Track:" (HTML5 Basics). A "Short Biography:" section has a text area with a placeholder "Tell us about your coding background...". At the bottom, there is a checkbox for "I agree to the Terms of Service and Privacy Policy." and two buttons: "Register Now" and "Reset Form". The Windows taskbar is visible at the bottom, showing the search bar, task view, and various application icons.

<section id="about">
  <h2>About Me</h2>
  <p>Hello! I am a student pursuing web development. I love
building responsive, simple websites and learning new technologies in
the MERN stack.</p>
</section>

<hr>

<section id="skills">
  <h2>My Skills</h2>
  <ul>
    <li>HTML5 (Proficient)</li>
    <li>CSS3 (Intermediate)</li>
    <li>JavaScript (Basics)</li>
    <li>C++ Programming (Intermediate)</li>
  </ul>
</section>

<hr>

<section id="projects">
  <h2>My Projects</h2>
  <ol>
    <li>
      <strong>Student Mark Sheet Page</strong>
      <p>Designed a structured mark sheet page using HTML
tables to display grades and averages.</p>
    </li>
    <li>
      <strong>Personal Blog Page</strong>
      <p>Created a blog website displaying technology
news and personal notes with structured headers and paragraphs.</p>
    </li>
    <li>
      <strong>E-Commerce UI Mockup</strong>
      <p>Built a standard grid list showing product cards
and details.</p>
    </li>
  </ol>
